## Fast, Reliable Field Service

### Dedicated crane expertise

Trained Magnetech field technicians provide on-site expertise, consulting and technical knowledge to keep crane systems operating at peak productivity. With a proven track record for reliable service, quality workmanship and precise turnaround of all field reports, Magnetech provides cost effective solutions for your specific application.

## Conversions, Upgrades and Repairs

### We keep you up-and-running, and up-to-date

Our field service personnel are experienced at cab to pendant conversion and radio control upgrades, and are on their way at a moment's notice for fast, reliable repair service.

## Inspection and Consulting Services

### Efficient and thorough

Magnetech field service technicians are trained to perform your thorough in-plant OSHA required inspections on a frequent, periodic or annual basis, in-plant hoist rope inspections and magnetic particle inspections of crane hooks. Customers also rely on Magnetech for expert consulting services, including runway evaluations and accident investigations.

## Preventive Maintenance

### Stopping problems before they start

Magnetech can help you avoid unscheduled downtime with comprehensive scheduled outage service and troubleshooting. In addition, a preventive maintenance program through Magnetech can ensure productivity and lower MRO costs.
