

Equipped to Handle All of Your Machining Needs

From endbells and frames to commutators and shafts, we can meet your industrial fabrication and repair needs. Our largest lathe is 46 tons of precision strength designed for optimum performance and heavy stock removal while providing the versatility required by a large range of industries such as:

- General purpose machine shops
- Power Utilities
- Automotive Manufacturers
- Oil Refineries
- Steel Mills
- Paper Mills
- Water Treatment
- And much more!

Complete Machine Shop & Fabrication Capabilities

Magnetech has full capacity to bore, grind, drill, mill and turn parts to precise dimensional specifications. We are equipped to manufacture new shafts and components and even straighten and repair large shafts. Our biggest lathe gives us the ability to machine large and bulky work pieces, such as armatures, rotors, turbines, couplings and pump impellers.

Whether you need an emergency repair to get back in production, equipment remanufactured to better than new condition, or advance warning of impending equipment failure, we offer complete support.

Large Lathe Statistics

Center distance	246 in.
Turning diameter in pit	185 in.
Width of pit in front of faceplate	68 in.
Work piece weight, unsupported, between centers	44 tons
Turning diameter over baseplate	103 in.

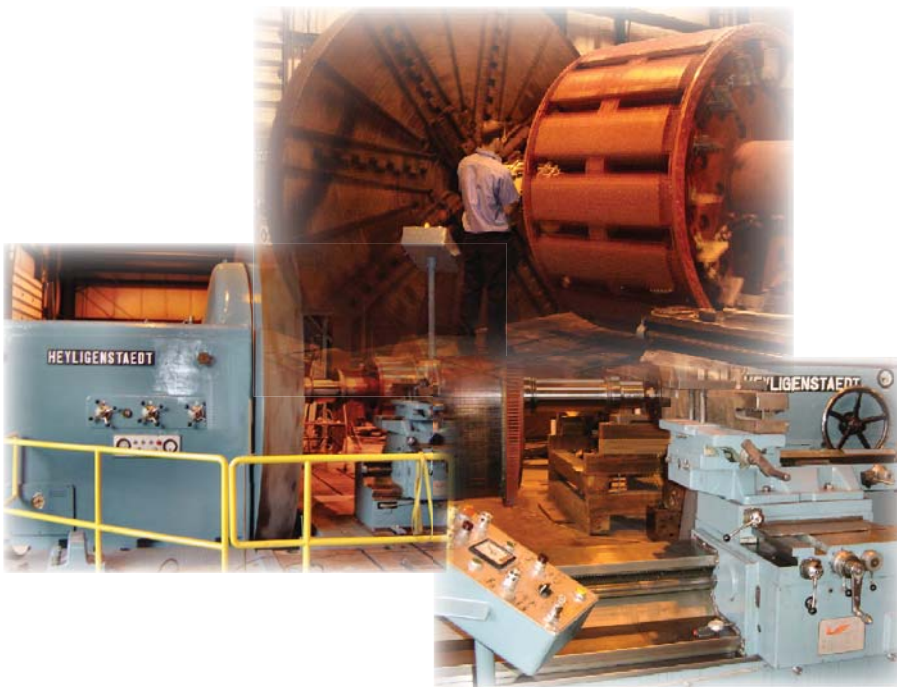

Additional Capabilities

Our capacity is evident in our equipment from lathes, mills, shapers, drill presses, overhead cranes and more combined with our professionally trained staff to handle:

- 60-ton lifting capacity
- Electroplating
- Rebabbiting
- Welding
- Reverse Engineering
- Shaft & Journal Repair
- CAD Engineering/Documentation

We're Ready to Meet Your Industrial Repair Needs

For assured equipment service, on-time and within budget, call the Magnetech service pros.
